Laboratory Safety Worksheet

1. Sketch the floor plan of the laboratory. Indicate the locations of exits, eyewash, safety shower, fume hoods, emergency blanket (if there is one), fire extinguisher, and first aid kit.

2. What are the laboratory rules about safety goggles?

3. What is the correct technique for checking the odor of a substance?

4. If you take too much of a chemical when working, what are you supposed to do with the excess?

5. What is the proper and safest way to handle a hot beaker or container?

6. What precautions should be taken to prevent staining or damaging your clothing in the laboratory?

7. Describe the laboratory policy on visitors and children in the laboratory. What reasons are there for this policy?

8. What is the correct way to dispose of chemicals at the end of the laboratory period?

I have read and will comply with all stated laboratory safety rules.
