

Bellevue College East Campus: BC COMES TO ISSAQUAH

Bellevue College has purchased a 20-acre parcel of land in the Issaquah Highlands as the future home of the BC East Campus.

- The site is located up the hill from the new Swedish Hospital Medical Center Issaquah Highlands location, on the east side of Highlands Drive near the Shops at Issaquah Highlands, the City of Issaquah soccer field at Central Park, and Grand Ridge Elementary.
- Bellevue College is already working with City of Issaquah officials on the planning process and intends to start with a single-building learning center .
- The college is considering a number of exciting options for what programs and classes will be offered and will work with regional businesses, civic and government leaders, neighbors and residents to gather input about the present and future needs of the community. Make your opinions known by taking our survey at <http://bellevuecollege.edu/surveys/TakeSurvey.aspx?SurveyID=m43K364>.

Bellevue College now has four campuses:

- **Main Campus, a 98-acre tract in south-east Bellevue near I-90 and 148th SE.**
- **North Campus, a single building in north Bellevue, near Microsoft's campus, for BC's Continuing Education programs.**
- **East Campus, the 20-acre site in the Issaquah Highlands.**
- **Online Campus, our virtual campus serving 12,000 students a year.**

Bellevue College is an academic institution with a long tradition of excellence.

- For 45 years, BC has provided innovative programs to help our students succeed. We demand rigor and excellence from instructors and students alike, and we focus on making our students successful. Our graduates are critical thinkers, ready to work in changing environments and adapt to emerging technologies.
- BC was recently accredited as a baccalaureate institution, while remaining an open-access college and staying true to the historical mission. The college offers transfer study (the first two years of college) in more than 50 disciplines; work-related training through more than 90 programs; and the most extensive Continuing Education curriculum in the state.
