Job opportunities for web designers and developers are expected to have an increase of 20% (approximately 28,500 positions) from 2012-2022.

Web designers are likely to occupy at least some percentage of the 17,400 graphic design positions expected to open up during the same period.

According to Indeed.com, there are over 1,000 jobs in the greater Bellevue, Washington area seeking employees experienced with HTML, CSS, User Experience design and other skills you will acquire through the Web Design Certificate.

Fees:

- $72,000

Why Web Design at Bellevue College Continuing Education?

- Offers a breadth of classes with a focus on user-centered design and technical skills demanded by employers today
- Program is practical, interactive, and directly transferable to the workplace
- Designed and taught by professionals who currently work in the field
- Flexible program lets you start any quarter you like and finish at your own pace

Employment Outlook

- 20% expected growth in job opportunities for web designers between 2012 and 2022

Program Components

- Covers core technical skills of HTML, CSS and web scripting, as well as design techniques including user experience studies, designing for different screen sizes and search engine optimization
- Emphasizes learning by doing, classes are built around hands on exercises and projects
- Culminates in a Capstone Project in which participants will design a functioning website for a client
- Program can be completed in 1-3 years but you may take as long as three years to earn your certificate through courses offered evenings and weekends

Build a Foundation in the Essentials

If you aren’t sure a career in web design is where you want to go, consider taking this series of five essential classes. These classes provide a foundation for careers across web design, web development, and user experience/user interface (UX/UI) design:

- Design Principles
- HTML and CSS: Level 1
- HTML and CSS: Level 2
- Responsive Web Design
- User Experience Design Fundamentals

What is a Web Designer?

A web designer is someone who prepares content for the web. This role is mainly related to the styling and layout of pages with content, including text and images. Web designers use many technologies but commonly rely on hypertext and hypermedia resources including HTML, CSS and additional web design tools.
